

New Product Announcement | High Capacity Hose Reels

Heavy Duty Spring Retractable Hose Reels Series G9000 / D80000

Reelcraft's new Series G9000 hose reels are designed to be compact and allow for longer lengths of larger diameter hose. The redesigned gooseneck can be removed from the reel for easier hose attachment. An external drive spring allows for convenient access to the spring components and improved servicing of the reel. The roller bearing inside of the pillow block produces a smoother spool rotation and easier operation. The Series D80000 dual pedestal base and guide arm design is structurally reinforced. The guide arm is field adjustable for wall, ceiling, or truck mounting positions.

NEW!
