

Bottom Wind Base Plate S602778

Reelcraft's new bottom wind base plate allows for upright, overhead mounting of up to 8 different series of Reelcraft reels. Simply mount the reel to the base plate and position the guide arm in the bottom wind position or remove the guide arm (see chart below for instructions) and secure the hose or cord through the roller guide with a bumper stop assembly.

- **Durable design** - The base plate is fabricated of heavy gauge steel along with high impact, nylon-filled guide rollers.
- **Versatility** - The base plate can be used with 8 different series of Reelcraft reels.
- **Corrosion resistant** - Steel components are powder coated to provide maximum protection from premature corrosion.

Model	Shipping Weight		A		B
