Powder Coating - Small Frame Reels Special Powder Coating Cost

Reelcraft uses a rigorous cleaning process on raw parts prior to paint. First, an alkaline cleaner is applied to remove dirt and oil from the manufacturing process. The parts are then rinsed before being chemically pre-treated to achieve optimal paint adhesion and salt spray resistance. They receive a second rinse to remove any contaminants. Lastly, parts are coated with a high quality, durable polyester powder coat paint. The painted parts are cured and ready for assembly. The end result is a uniform, corrosion resistant finish that will last through years of service.

Primary Colors - NO CHARGE

Reelcraft is most well-known for its bright red powder coat paint that is standard on all spring driven and smaller hand crank reels.

Secondary Colors

Reelcraft frequently paints secondary colors. There is no set-up charge for secondary colors, only a variable per unit charge and a possible increase in lead time.

Special Order Colors

We thoroughly clean our booths/tools prior to painting special order colors and, thus require a set-up charge in addition to the variable per unit charge. Contact Reelcraft for additional colors not listed. Be aware that special paint may add to lead time.

Primary Colors - NO CHARGE

Reelcraft is most well-known for its bright red reels, but we also paint grey at no extra charge. If grey is desired, it must be specified at time of order. Mil thickness may vary with color to achieve maximum corrosion resistance.

Secondary Colors

Reelcraft frequently paints secondary colors. There is no set-up charge for secondary colors, only a variable per unit charge and a possible increase in lead time.

Special Order Colors

We thoroughly clean our booths/tools prior to painting special order colors and, thus require a set-up charge in addition to the variable per unit charge. We will gladly paint any color of your choosing. Paint sample match is available. Be aware that special paint may add to lead time.
